DETAILED ACTION

Claims 1-14 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to an enzymatic method of producing a peptide, classified in class 435, subclass 68.1.

For Invention I above, restriction of the following sub-inventions is also required under 35 USC 121. Therefore, election of one of (A)-(C), one of (D)-(F), one of (G)-(J), and one of (K)-(O) is required.

Elect one of:

- (A.) A culture of a microbe
- (B.) Microbial cells
- (C.) A treated microbial cell product

Elect one of:

- (D.) An unprotected peptide
- (E.) A C-protected peptide
- (F.) A peptide with a C-terminal amine

Elect one of:

- (G.) SEQ ID NO: 6, encoded by SEQ ID NO: 5
- (H.) SEQ ID NO: 12, encoded by SEQ ID NO: 11
- (I.) An *Empedobacter* enzyme
- (J.) A *Sphingobacterium* enzyme

Art Unit: 1656

Elect one of:

(K.) An L-alanine ester

(L.) A glycine ester

(M.) An L-tyrosine ester

(N.) An L-tyrosine ester

(O.) A D-alanine ester

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Also, product and process inventions are distinct if any of the following can be shown: (1) that the process as claimed can be used to make another and materially different product, (2) that the product claimed can be used in a materially different process of using that product, or (3) that the product claimed can be made by another and materially different process (MPEP § 806.05(h)). These inventions are different or distinct for the following reasons.

Inventions (A)-(O) are independent because the methods of Inventions (A)-(O) comprise different steps, utilize different products and/or produce different results.

Because the methods of Inventions (A)-(O) comprise different steps, utilize different products and/or produce different results, as search for more than one of Inventions (A)-(O) would be a burden on the Office.

These inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, as shown by their different

Art Unit: 1656

classification. Furthermore, as explained above, searching more than one invention would be a burden on the Office. Therefore, restriction for examination purposes, as indicated, is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
